

FIG.1

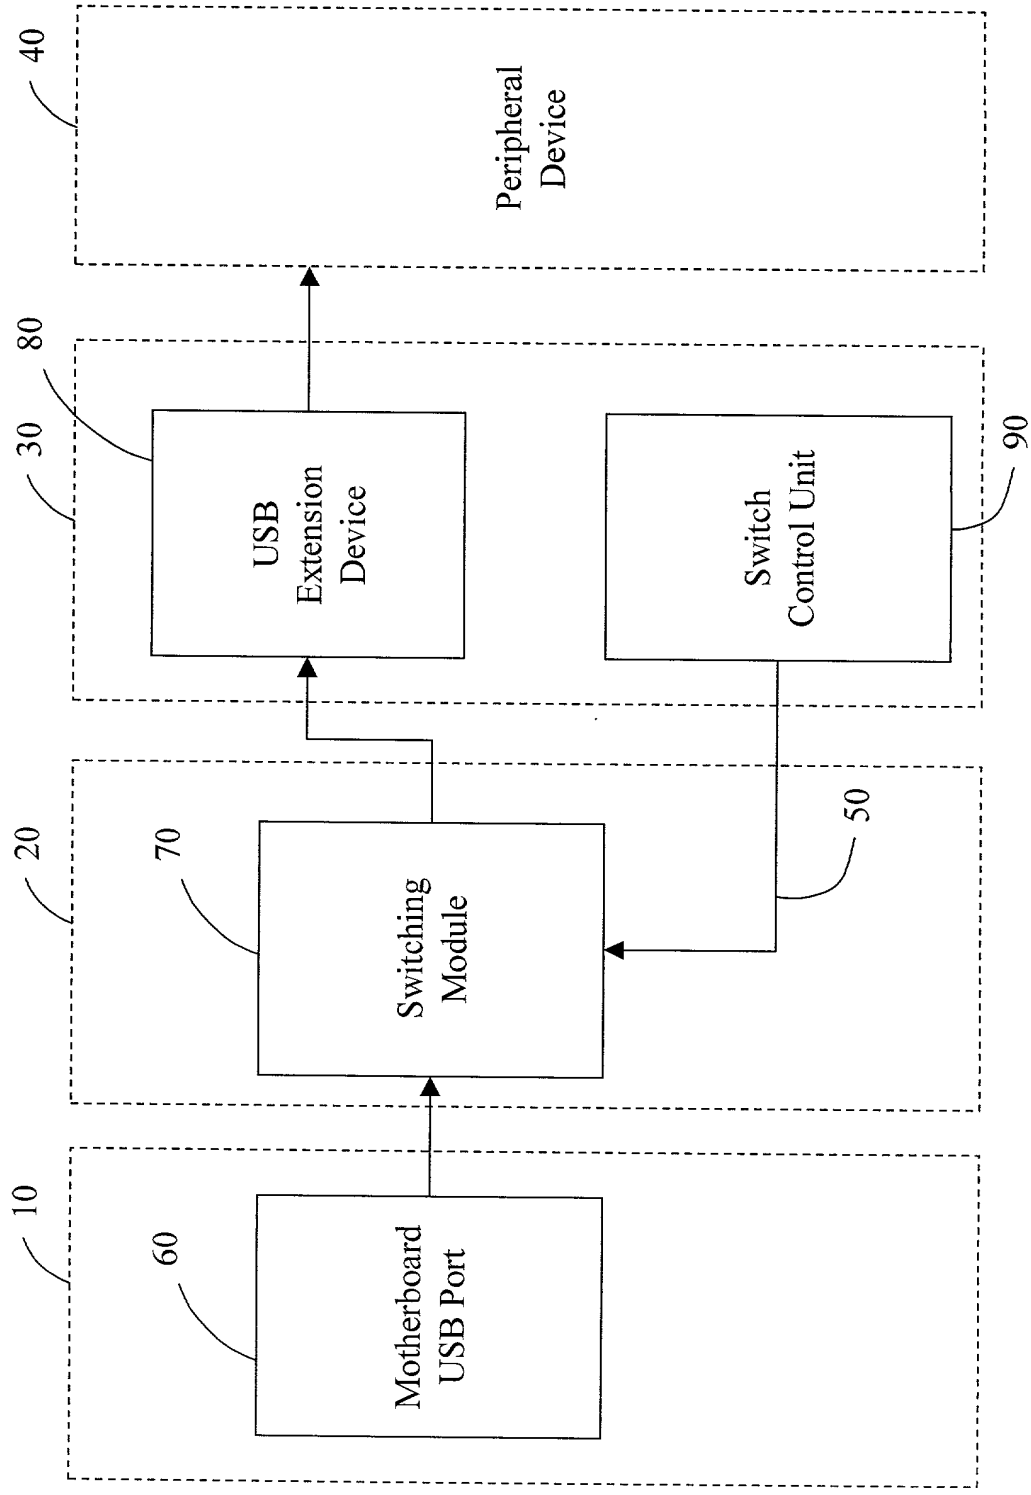

FIG. 2

FIG. 3 is a block diagram of a system architecture showing a computer system (10) connected to a network (20) via a network interface (30). The computer system (10) includes a motherboard (100) with multiple USB ports (110, 120, 130). A USB extension device (80) is connected to the motherboard (100) and provides additional USB ports (140, 150, 160, 170) for various peripherals (180, 190, 200, 210). A switch control unit (90) is also connected to the system.
